

AXELAY

KISS YOUR AXELAY GOOD-BYE.

You're stewed. Even though you've got the Axelay prototype combat stratafighter with the most sophisticated weaponry in the Illis solar system, the 3-D graphics and perspectives are so realistically shocking that you'll probably freak out and bury the ship in an asteroid. Nevertheless, you're the only remaining hope for a cluster of worlds bonded by one common goal - to suppress the ruthless onslaught brought forth by the Armada of Annihilation in a six level galactic blitzkrieg.

The planets of the Illis solar system combined their technology to create a defense force like no other by engineering the D-117B, code name; Axelay. A fighter so advanced and costly, only one could be built:
